BS EN 12613 is the EUROPEAN STANDARD for underground warning tapes & mesh.

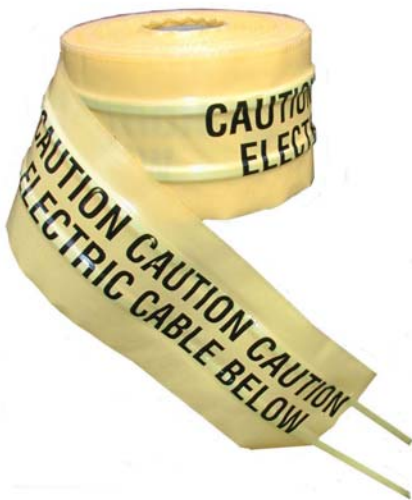

The new standard has been written to combat the potential for damage to buried utility lines from modern, efficient mechanical excavators.

**KEY POINTS**

When excavated, there should be

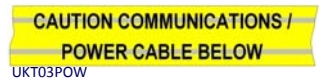

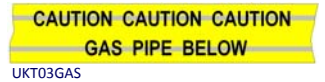

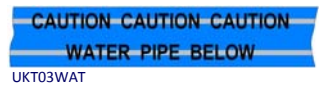

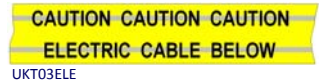

- 200mm of tape or mesh visible in the trench
- 200mm of tape or mesh visible in the bucket

**EURO UTILITY™ WARNING TAPE TO BS EN 12613**

- Patented warning tape
- Complete with two reinforced polypropylene bands
- 40 times stronger than BS EN12613 requirements
- 200mm visible in both the trench and bucket
- Scratchproof covering protects the printed surface

Size
150mm x 100M

**WARNING MESH TO BS EN 12613**

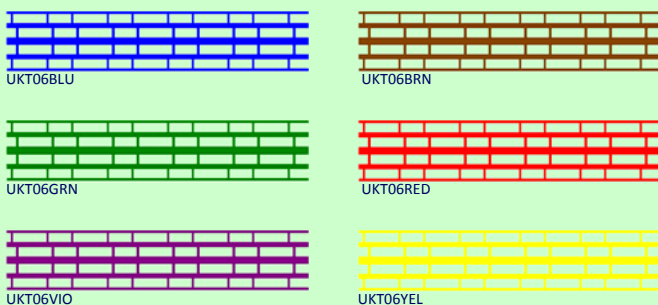

- High strength, high visibility plastic warning mesh
- Complies with the requirements of European Standard EN 12613
- 200mm visible in both the trench and bucket
- Available in STANDARD and DETECTABLE versions

Width	Length
200mm or 300mm	100M

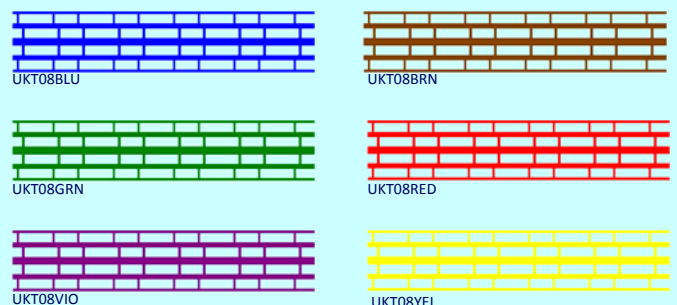

When ordering, suffix part number with 200 for 200mm wide or 300 for 300mm wide  
Eg UKT08RED300 for 300mm Red Detection Mesh

**STANDARD (non-detectable)**

**DETECTABLE**

### EARTHSAVE™ BARRIER TAPE

- Degradable plastic barrier tape
- Made from our new EARTHSAVE™ plastic
- Printed with high visibility warning stripes

UKT137RW250

Ref	Size
UKT137RW250	75mm x 250M

EARTHSAVE™ is an innovative new degradable plastic from UK Tapes Ltd. Once exposed to UV light, the polythene will start to degrade.

Degradation continues even in the dark and is accelerated by heat, making the product ideal to be disposed of by burial.

The end products of the degradation are Carbon Dioxide, water and a very small residue of non-toxic inert material.

UK TAPES LTD is pleased to make a charitable donation of £ 0.10 for every roll of EARTHSAVE™ tape sold
